## Colt Weather Option (CWO)

The colt weather option is a drop-in system for use in a DEF (aus32, AD-Blue) tank. DEF has a freezing point at  $-11^{\circ}\text{C}$ . The CWO keeps the tank on a typical adjusted temperature, so the DEF will not freeze. Even from a black start the system will work.

The system consist of:

1. Temperature control box
2. Heating element
3. Temperature sensor
4. Level switch
5. Heat traced hoses (Option)

The system is free configurable to meet the typical requirements. Also ask for the process connections.

Product Data Sheet:

Dimensions: 250x200x90 (LxWxH)

Weight: 2 kg

Power: 230V/50Hz - 16Amp.
